

# ESPLORA OUTING

24th January 2017

*Year 3*

The Year 3s had the opportunity to visit Esplora, Malta's Interactive Science Centre in Bighi.

There, we enjoyed various hands on activities. We learned about the human body, electricity, forces, illusions and much more.

We all enjoyed the interactive show about different types of sounds: how it is produced, how it can be altered, how it travels to our ears and how a straw can make a particular sound.

It was a great day!
